

M  S T R A L

- design for your life

# Welcome home

We live in beautiful surroundings and like to look after them. We are Danish design. We manufacture and assemble all our furniture in Denmark. This means that everyone who owns a piece of MISTRAL furniture is assured fantastic design and genuine craftsmanship and is guaranteed a creativity in all details and materials – assembled by creative craftspeople.

# We are inventive, energetic and always on the go

Creativity is both inspiration and transpiration. We do not just get great ideas from nowhere: we work and finish, test, check and carry on until everything is right. Just right. We are always busy with new thoughts, new ideas – because we want to develop.

# The MISTRAL is the detail that makes the difference

MISTRAL has been something special since Danish designer Lone Sterner Nordam started creating her first items of furniture in the 1990s. At the start of the new millennium, architect Jacob Jacobsen designed a new conic and iconic handle. Under the name of MISTRAL, it now symbolises everything that differentiates MISTRAL from all the others.

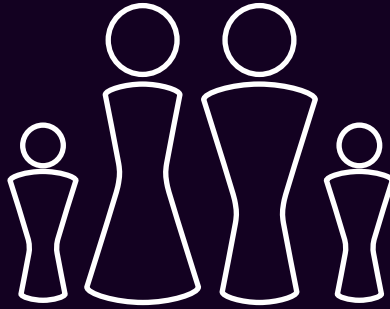

# From handle to concept

The balanced – and yet disharmonious – MISTRAL teases and provokes the eye. Over time, it has gone from being a handle to becoming a concept. It is synonymous with Danish design, more space and many more possibilities for organising the home.

# Design for your life

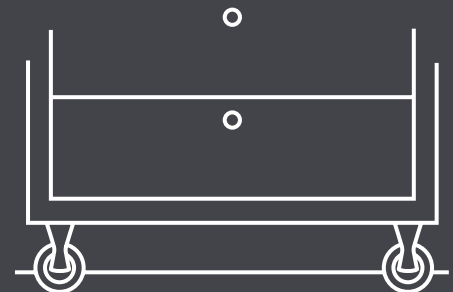

We are all the same, but still different. That is why we all need the same opportunities – each in our own way. MISTRAL matches and challenges, pleases and provokes. Features and ideas that all come together. For you. For everyone. MISTRAL always offers one more possibility – all your life.

Everywhere in the home,  
wherever you are in the world

The MISTRAL is part of our lives. It is part of our DNA. We are proud to see how it conquers new homes and hearts every day – thanks to what it stands for: form, function, design and the ambition to shape the world and make room for the unique. And the simple.

Designed,  
manufactured  
and assembled  
in Denmark

MISTRAL – good  
for you and  
for the  
environment
